

SKILLS & TECH STACK

- Java Script (React.js , Next.js , Node.js)
- Delphi 7/10
- SQL (PostgreSQL , MySQL , SQLite)
- MongoDB
- Python (Odoo ERP)
- Google App Script
- Node-Red
- Jenkins (Support Devops)
- Docker (Support Devops)
- AWS (Support Devops)

ENGLISH SKILLS

- Reading	Good
- Listening	Good
- Writing	Fair
- Speaking	Fair

Line : 095-284-1879
Address : MapleCity M1(804) 66/1 Moo 1, Khlong Chet, Khlong Luang, Pathum Thani 12120
Email : naruesorn.wt@gmail.com
Date of Birth : 4 September 1999

ACTIVITY

- Thailand Digital Young Talent : Selected participant in a national tech competition focusing on software innovation and system integration.

- Global Capstone Design Camp : Collaborated with international students to solve real-world industry problems using technology.

EDUCATIONAL INFO

Rajamangala University of Technology Thanyaburi
- Bachelor of Computer Science
- Graduated in 2022

Naruesorn Wattanapipat (Bank)

WORK EXPERIENCE

AUG 2025 - CURRENT

FULLSTACK DEVELOPER (SYNERGY GLOBAL NETWORK)

- Developed and maintained Full Stack web applications using TypeScript, Next.js (Frontend), and NestJS (Backend).
- Designed APIs and database structures on SQL Server using Sequelize ORM, and leveraged AI tools such as GitHub Copilot, Codex, and Cursor AI to enhance development speed, code quality, and system architecture design.

AUG 2024 - AUG 2025

FULLSTACK DEVELOPER (TECH STELLAR)

- Developed new features for ongoing projects using Node-RED, Next.js, and React.js, improving system flexibility and user interaction.
- Integrated 4 payment gateways, supporting 3DS/redirect and callback.
- Maintained and refactored legacy codebases, reducing technical debt and ensuring long-term stability of internal tools.
- Reduced dev backlog by debugging and optimizing legacy features across 3 cross-functional teams.
- Supported DevOps tasks by troubleshooting deployment issues, editing Dockerfiles and Jenkins pipelines, and ensuring smooth UAT releases.

APR 2024 - AUG 2024

ODOO DEVELOPER (PERFECT BLENDING)

- Developed and enhanced existing project features as per the instructions of the System Analyst (SA): Improved and expanded the system to better meet business requirements. in Odoo ERP Version 14
- Designed and developed new Addons to support customer needs: Designed addons to support online auction functionality, tailored to customer-specific requirements, enhancing user experience and system functionality.

NOV 2022 - APR 2024

PROGRAMMER (S11 GROUP)

- Develop a Windows application for internal use within the company according to user requirements using Delphi 7.
- Add new features to existing project.
- Unit testing a new project or features that has been developed.
- Basic RESTFUL API for time attendance program by google appsheet using Delphi 10.
- Developed Google Apps Script to send data from Google AppSheet to a Delphi 10 app server.
